

#	Title	Learning Objective	Presentation scheduled on:	Presenters
2087	The Development of a University-Based Specialty Program for State Prisoners with Gender Dysphoria	By the end of the seminar/presentation, participants will be able to: 1) List essential DSM-5 diagnostic criteria related to gender dysphoria (formerly known as gender identity disorder) 2) Describe the history and current landscape of gender dysphoria and transgender issues, to include relevant legal issues, within correctional settings 3) Explain the clinical presentation, diagnostic evaluation, and treatment needs of incarcerated individuals with gender dysphoria 4) Describe evaluation and treatment challenges of incarcerated individuals with gender dysphoria who present to correctional and primary care practitioners and specialists	Thursday, 3/17	Joseph Penn, MD; Owen J. Murray, DO; MBA; Olubenga Ojo, MD; Kelly Coates, MBA
2103	Trajectories of psychological distress and mental health service access after prison release	By the end of the seminar/presentation, participants will be able to: (1) Describe the variation in trajectories of psychological distress after prison release among male and female prisoners in an Australian setting; (2) recite predictors of high and low trajectories of distress; (3) discuss the system of publically-funded mental health care in one Australian state, and how frequently these services are accessed by ex-prisoners with different longitudinal patterns of psychological distress.	Thursday, 3/17	Emma Thomas, BSc, MSc
2019	Self-harm following release from prison: a prospective data linkage study	By the end of the seminar/presentation, participants will be able to: 1. Discuss the magnitude of the problem of self-harm in offender populations whilst incarcerated. 2. Describe patterns of self-harm in a cohort of previously-incarcerated adults after their release from prison. 3. List the clinical and demographic predictors of self-harm after release from prison, and of what might be done to address this problem; both during incarceration and their transition back to the community.	Thursday, 3/17	Rohan Borschmann, PhD, DCLinPsy, BBS
2117	Domestic Sex Trafficking and Health: Perspectives and Experiences of Survivors on Rikers Island	By the end of the seminar/presentation, participants will be able to: 1. List the common reasons for entry into trafficking among incarcerated women 2. Describe common health concerns of domestically sex trafficked women 3. Explain common barriers to health among domestically sex trafficked women	Thursday, 3/17	Anita Ravi, MD, MPH
2096	Correlation of Trauma and PTSD to Emergency Department Utilization, Criminogenic Risk and General Health among Formerly Incarcerated Individuals	By the end of the seminar/presentation, participants will be able to: 1. Describe the relationship between trauma and criminogenic risk, emergency department utilization and poor general health. 2. Summarize the burden of trauma exposure and PTSD among individuals that have faced incarceration 3. Compare the discrepancy between formerly incarcerated individuals carrying PTSD diagnoses versus those endorsing PTSD symptoms	Thursday, 3/17	Danielle Alkov, MD; Shira Shavit, MD; Emily Wang, Assistant Professor Gen Intern; Jenerius Aminawung, Research Associate III
2068	Outcomes of the ASIST program for high-risk offenders with mental illness	By the end of the seminar/presentation, participants will be able to: 1) Describe the population of offenders with mental illness who require greater supervision in order to be successful. 2) Explain how propensity matching can be used to create a post-hoc comparison group, given available administrative data. 3) Identify areas of improved outcomes for offenders with mental illness who are served by the ASIST program.	Thursday, 3/17	Linda Frisman, PhD; Hsiu- Ju Lin, PhD
2095	Understanding the Physiological Process Underlying Morality, Sexual Behavior, and Risky Decision Making among Offenders	By the end of the session, participants will: 1. Understand physiological processes related to risky decision making 2. Identify risk and protective factors associated with risky decision making (including the concepts of STIs, moral violations, etc.), specifically in the correctional population 3. Discuss results of this study with a goal of informing and guiding future studies, policy implications and interventions within the correctional population	Thursday, 3/17	Fallon Branch, BA working on MS; Madison Gates, PhD

2012	Navigating the Disability Determination Process from the Perspective of Justice-Involved Adults with Serious Mental Illnesses	This presentation will allow participants to: 1. Describe the disability determination process and how it affects offenders with SMI, 2. Discuss to the lived experiences of offenders with SMI, 3. Apply the information gained through the presentation to create improvements in justice programming.	Thursday, 3/17	Erin McCauley, BA (M Ed Student)
2020	Characteristics of Inmates who Initiate Hunger Strikes in the New Jersey Department of Corrections	1. Describe the characteristics of inmates in the NJDOC who engage in hunger strikes. 2. Explain that inmates' dissatisfaction with the disciplinary process and dissatisfaction with disciplinary housing were the most common reasons given for a hunger strike. 3. List the elements of compromise between the inmate and the NJDOC which ended longer hunger strikes	Thursday, 3/17	Rusty Reeves, MD
2080	Black, Locked-Up & Stressed Out: Racial Distress of Black Males Pre- and Post-Incarceration - Ebony Russ, MA, MS, et al	By the end of the seminar/presentation, participants will be able to: 1. Describe the stressors of non-incarcerated African American males ages. 2. Analyze potential diagnosis of mental health disorders for African American males. 3. Explain how to strengthen psychological interventions and support the development of new evidence-based practices (EBPs) for African American males.	Thursday, 3/17	Ebony Russ, M.A. M.S., Marie Claude Jipguep- Akhtar, PhD; Vernetta Young, PhD
2043	The Impact of Imprisonment on Mental Health: A Propensity Score Approach	By the end of the seminar/presentation, participants will be able to: (1) describe the prevalence of depression and PTSD among young adult men in prison; (2) analyze issues of selection and causal inference including limitations to quasi-experimental approaches; (3) explain the evidence for a causal effect of imprisonment on mental health	Thursday, 3/17	Kathryn Nowotny, MA
2067	Disabilities and Mental Illness among the U.S. Incarcerated Populations: National Statistics from the Bureau of Justice Statistics	By the end of the seminar/presentation, participants will be able to: 1) Describe the Bureau of Justice Statistics' (BJS) self-report data collections and measures that produce key statistics related to disabilities, mental health, and mental health treatment, 2) List the most recent findings on disabilities, mental health, and mental health treatment among the nation's prisoners and jail inmates, and 3) Explain the extent to which disabilities and mental illness are prevalent among the nation's incarcerated veterans.	Thursday, 3/17	Jennifer Bronson, PhD; Lauren Glaze
2121	Health Status of Jailed Inmates with Serious Mental Illness	By the end of the seminar/presentation, participants will be able to:1. Become familiar with the health data that currently exists for the jailed population. 2. Become familiar with the health status of a sample of a large, urban jailed population; the similarities and differences found among those with serious mental illness (SMI) and those without. 3. Become familiar discussing the barriers to research/attainment of this knowledge.	Thursday, 3/17	Mary Kay Dollard, MSN
2021	Falling in line with the HIV Cascade of Care Model: A comparison of HIV and Substance Abuse Outcomes for Opioid Treatment Seeking and Non-Opioid Treatment Seeking HIV-infected Patients living in Washington, D.C. - Marissa Kiss, MA	Participants will be able to: 1. Discuss the drug use patterns, criminal justice involvement, risky health and drug use behaviors, and HIV outcomes for HIV positive, opioid dependent individuals living in Washington, DC. 2. Describe the differences between opioid treatment seeking and non-treatment seeking participants with regard to drug use, criminal involvement, participation in risky behaviors and HIV outcomes. 3. With a focus on the HIV Care Continuum model, analyze if participants are receiving adequate care to treat their HIV such that they are being prescribed antiretroviral therapy (ART), are adhering to ART, and whether participants are virally suppressed.	Thursday, 3/17	Marissa Kiss, MA
2050	Risky methamphetamine use, acute health service utilisation and recidivism: A prospective data linkage study	By the end of the seminar/presentation, participants will be able to: 1. Describe the recent upward trend of high-risk methamphetamine use in Australia, including among people who are incarcerated, as well as the implications for health, social and justice services. 2. List some of the risks that methamphetamine users face upon return to the community, and how these may manifest in presentation to acute health services, or return to custody 3. Discuss potential evidence-based responses to risky methamphetamine use in custody and, critically, after people with a history of risky methamphetamine use return to the community.	Thursday, 3/17	Craig Cumming, LLB/ Criminology Undergraduate

2036	Preventing mortality after release from prison: Advancing global knowledge through individual participant data meta-analysis	By the end of the seminar/presentation, participants will be able to: 1. Describe the literature on mortality after release from prison, including what is known and important gaps in knowledge 2. explain what individual participant data meta-analysis (IPD-MA) is, and how it can help to address some of these knowledge gaps 3. plan to join an international consortium of researchers planning to use IPD-MA to synthesise findings across cohorts	Friday, 3/18	Stuart Kinner, PhD; Rohan Borschmann, PhD, DCLinPsy
2040	Evaluation of a case brokerage transition service for prisoners with mental illness	By the end of the seminar/presentation, participants will be able to: 1. Describe effective approaches to engaging people with mental health problems with services. 2. List the issues important in the development of clinical services. Analyze the issues involved in trying to evaluate clinical initiatives	Friday, 3/18	Sophie Davison, MA, MBBChir, MPhil, FRCPsych
2059	History of psychiatric hospitalisation and acute health service contact after prison release: a cohort study	By the end of the session, participants will: 1. Describe the current evidence on the mental health of ex-prisoners with a primary focus on the mental health-related outcomes during transition period after release from prison 2. List the primary factors related to health service contact for those with and without mental illness involved with the criminal justice system. 3. Describe some potential frameworks for feasible preventive interventions in the context of the findings from the current study and outline of recommendations for further pragmatic investigations. 3. Discuss of the role that pre-release transitional health planning and continuity of care can play in improving the health and health service outcomes for ex-prisoners integrating back into the community.	Friday, 3/18	Jesse Young, BSc, MPH
2084	Explaining the Relationship among Psychotropic Medications, Weight Gain and Chronic Diseases in a Correctional Setting Madison Gates, PhD, et al	By the end of the session, participants will: 1. Describe the relationship among psychotropic medications, changes in weight and chronic diseases. 2. Identify and list risk and protective factors associated with weight gain and their relationship to correctional policies and practices. 3. Discuss results of this study with a goal of informing and guiding future studies, policy implications and interventions with women offenders.	Friday, 3/18	Madison Gates, PhD; Elizabeth Hogan, MD; Thad Wilkins, MD; Veronica Walker, MSLS; Wonsuk Yoo, PhD
2042	Negative Health Outcomes Associated with Depression among Older Prisoners with Chronic Medical Illness - Lisa Barry, PhD, MPH	By the end of the session, participants will: 1) Articulate the prevalence of depression among older prisoners with chronic medical illness; 2) List factors associated with depression among older prisoners with chronic medical illness; 3) Explain how the study findings may enhance knowledge regarding the potential incremental effect of depression among older prisoners with chronic illness.	Friday, 3/18	Lisa Barry, PhD, MPH
2086	Taking It to the Extreme - Addressing Serious Injurious Behavior in an Intensive Mental Health Unit - Daniel Bannish, PsyD, et al	By the end of the seminar/presentation, participants will be able to: 1) list characteristics typical of inmates with extreme behaviors; 2) describe implementation factors related to development of an IMHU; 3) explain fiscal and administrative changes associated with management of extreme behavior.	Friday, 3/18	Daniel Bannish, PsyD; Eric Bueno, MS
2090	START NOW: Targeting Mood Dysregulation, Impulsivity, Interpersonal Discord in Female Inmates, Robert Trestman, PhD, MD, et al	By the end of the seminar/presentation, participants will be able to: 1) recite the gender specific mental health treatment needs of female offenders 2) explain the approach that START NOW takes to address gender-specific needs 3) describe the opportunity to assist female offenders to improve affect management and impulsivity	Friday, 3/18	Robert Trestman, PhD, MD; Julie Guiher, PhD
2024	The Relationship between Incarceration and Outcomes of Buprenorphine Maintenance Treatment - Daniel Riggins, BA	By the end of the seminar/presentation, participants will be able to: 1. Describe how a history of incarceration may affect buprenorphine treatment outcomes. 2. Explain how retention in buprenorphine treatment affects subsequent incarceration.	Friday, 3/18	Daniel Riggins, BA

2039	Receipt of Pharmacotherapy for Alcohol Use Disorder By Justice-Involved Status Among Veterans Health Administration Patients - Andrea Finlay, PhD	By the end of the seminar/presentation, participants will be able to: At the end of this presentation, participants will (1) Describe the pharmacotherapy for alcohol use disorder among justice involved veterans in VA, and (2) Explain its effectiveness compared to veterans without justice involvement.	Friday, 3/18	Andrea Finlay, PhD
2011	Assessment of Attitudes towards Naltrexone & Methadone Treatment Among an Incarcerated Population - Jordan Hyatt, JD, PhD, et al	By the end of the seminar/presentation, participants will be able to: 1. Discuss the differential attitudes towards pharmaceutical opioid treatment options among an incarcerated population; 2. Analyze the implications for correctional and health policies; 3. Explain the challenges and value in conducting survey research with incarcerated populations.	Friday, 3/18	Jordan Hyatt, JD, PhD; Daniel Langleben, PhD; Bret Bucklen; Nicolette Bell, PhD; AnLi Wang, PhD
2049	An Inmate's Guide to a Smoke-free Life on the Outside - Maria Saraf, et al	By the end of the seminar/presentation, participants will be able to: 1. Recite the prevalence of smoking and relapse among the incarcerated population; 2. Describe elements of the workbook and the video used for this project and the techniques proposed by them; 3. Explain the need for a universal smoking cessation program for inmates that focuses on positive behavior modification to prevent relapse after release.	Friday, 3/18	Maria Saraf, Arianna Lanpher
